toilets

wand. Kevin Kang of Ace Bidet in Atlanta says bidets and washlets are beneficial for the elderly, the physically challenged, pregnant women, and those who simply want the added personal hygiene.

Finally, consider flow. Since the federal government passed laws years ago aimed at water conservation, toilets have been modified from a 3.5-gallon flush to a "low-flow" 1.6-gallon flush. Since then, the race has been on to develop toilets that will reliably and consistently perform well under these requirements.

Most designers recommend shopping at a plumbing supply house, where an expert can help you find the quality and performance that will also meet your specific design and functional needs.
